- [Software Engineering](#) internship by Goldman Sachs's.

## PROJECTS

CALENDAR : [kushwi15.github.io/Calendar](https://kushwi15.github.io/Calendar) 📅

- Developed a **customizable calendar reminder system** with **easy update and delete features**, ensuring **efficient task scheduling** and seamless user experience.

[Church Management System](#) 📅

- Designed a comprehensive system in Figma, incorporating **membership management, donation tracking, event calendar**, communication tools, volunteer coordination, child check-in, small group management, and reporting analytics

FRUITISHES : [kushwi15.github.io/fruitishes-app](https://kushwi15.github.io/fruitishes-app) 📅

- Built a **responsive front-end e-commerce website** for organic foods using **HTML, CSS, JavaScript, and Bootstrap**, featuring product listings, testimonials, and user-friendly navigation.
- Designed an **intuitive UI with features like product categories, free shipping offers, and customer testimonials** to enhance user engagement.

SREETEQ : [sreeteqservices.vercel.app/index](https://sreeteqservices.vercel.app/index) 📅 [Figma](#) 📅

- Developed a **service management platform for SREETEQ**, incorporating **efficient scheduling, tracking, and customer management** features to enhance operational workflows.
- Created **user-friendly interfaces with Figma** and implemented **dynamic functionalities using React JS and JavaScript**, while **integrating RESTful APIs for efficient data handling and connectivity**.
