PROGRAMMING LANGUAGES

- HTML & CSS (Markup & Styling)
- JavaScript
- TypeScript

FRAMEWORKS & LIBRARIES

- React JS
- Tailwind CSS
- Bootstrap
- Shadcn UI

BACKEND & DATABASES

- Node.js
- MongoDB
- SQL Server

MOBILE DEVELOPMENT

- React Native
- Expo

CLOUD, HOSTING & DEVOPS

- AWS
- Cloudinary (Cloud Media API)
- Git & GitHub
- GitLab
- Netlify
- Render
- Vercel

DESIGN & DEV TOOLS

- VS Code
- Postman
- Figma
- Canva
- ExpoGo
- Antigravity
- Gen AI

EDUCATION

B.E - MECHNICAL ENGINEERING
Dhanalakshmi College Of Engg | 2023
CGPA - 8

CAREER OBJECTIVE

A passionate **MERN Stack Developer** with 2 years of hands-on experience in developing robust web and mobile applications. Keen to leverage technical expertise in **React JS, Node.js, and MongoDB** to create efficient, scalable solutions while contributing to innovative software teams and driving business success.

PROFESSIONAL SUMMARY

- Hands-on experience in building **full-stack applications** using the MERN stack (MongoDB, Express, React, Node.js).
- Proficient in **Agile/Scrum** environments, collaborating with cross-functional teams to deliver project goals.
- Strong foundation in **problem-solving** and **OOP principles**, ensuring scalable and maintainable code.
- Skilled in building **RESTful APIs** and responsive UI components using **Tailwind CSS and Shadcn UI**.
- Experienced in managing **cloud infrastructure** on **AWS** and version control using **GitHub**.

EXPERIENCE

- Basel Dynamics Tech Solutions - Associate Engineer - **Feb 2024 - Present**
- Hope Hospital - Web Developer - **Jan - Feb 2026 (Freelancer)**
- SVS Detailing - UI/UX Designer & Developer - **Nov 2025 (Freelancer)**
- SREE TEQ - UI/UX Designer & Developer - **July - Sept 2024 (Freelancer)**

FREELANCING PROJECTS

HOPE HOSPITAL CARE : hopehospitalcare.com

- **Developed** a specialized **Hospital Management System** using **React JS, Shadcn UI, and Node.js** to optimize clinical documentation and administrative workflows.
- **Implemented** real-time data synchronization by integrating **Google Spreadsheets** as a flexible backend and utilized **Google Maps Review Widget** to boost institutional credibility.

SVS DETAILING SERVICES : www.svsdetailingservices.com

- **Developed** the **SVS Detailing** professional service platform as a solo freelancer, delivering specialized web solutions for the **steel fabrication industry**.
- **Implemented** a high-fidelity visual layout and integrated **real-time data management** to significantly elevate the **user experience** and customer engagement.

SREETEQ : sreeteqservices.vercel.app Figma

- **Developed** a custom Home Appliances **service management platform** for **SREE TEQ**, featuring advanced scheduling and operational tracking modules.
- **Collaborated** on the UI/UX architecture using **Figma** and **implemented** cross-platform dynamic functionalities using **React JS and JavaScript**.

BASEL DYNAMICS PROJECTS

#2 Project Title : SIMS – Smart Institute Management System simstech.in
Technologies Used : React.js (Web), React Native (Mobile), Node.js, MongoDB, Tailwind CSS, Email JS, AWS, GitHub

Description

Developing a comprehensive **full-stack institute management system** designed to automate academic and administrative workflows. The platform facilitates seamless communication between administration, staff, and students, providing high efficiency in institutional operations.

Roles and Responsibilities

- **Developed** a high-performance **full-stack architecture** using **React.js (Web), React Native (Mobile),** and **Node.js (Backend)** for a unified management experience.
- **Implemented** a modern, responsive design system with **Tailwind CSS**, achieving seamless cross-device compatibility across all modules.
- **Collaborated** on the engineering of secure **RESTful APIs** and optimized **MongoDB** queries to handle complex institutional data flows.
- **Implemented** event-driven email automation using **Email JS** to ensure real-time user notification and registration verification.
- **Collaborated** and architected the cloud infrastructure on **AWS**, focusing on **performance optimization, high availability, and scalability**.
- **Participated** in collaborative development cycles and leveraged **GitHub** for robust version control and efficient team workflow.

#1 Project Title : Employee Management System
Technologies Used : React JS, Node.js, Express Js, SQL Server, Tailwind CSS, Git and GitHub

Description

The Employee Management System is a robust **web-based application** designed to manage employee information efficiently and streamline HR operations. It centralizes records, tracks attendance, and manages payroll, significantly improving data accuracy and organizational productivity.

Roles and Responsibilities

- **Developed** complex **RESTful service layers** using **Node.js and Express Js** to automate core HR lifecycle management and data processing.
- **Participated** in the development of a normalized and secure **relational database architecture** utilizing **SQL Server** for robust data integrity.
- **Collaborated** on building high-fidelity, pixel-perfect user interfaces with **React JS** and **Tailwind CSS** to enhance HR productivity.
- **Participated** in the development of automated **attendance and payroll modules**, significantly reducing manual administrative overhead.
- **Implemented** enterprise-standard version control and streamlined team collaboration foundations using **Git and GitHub**.
